

# The Big Yarn

---

**After surviving a bungled hit, a small town journalist is forced to team up with a wannabe cop to find out which of the puff pieces he's been working on masks a broader conspiracy.**

'Chubb' Buckley is deadly serious about being a big time journalist; disciplined, ethical, and respected. But it's hard getting noticed when you're stuck in Karratha writing for the local rag... especially if you're too preoccupied with details to write a story anyone enjoys reading.

When Chubb survives a bungled hit, he realises that one of the lame local stories he's been working on must mask a larger conspiracy. This is his big chance: He has one weekend to solve the mystery, get the scoop, and nail his job interview at the ABC on Monday morning. Problem is, he's forced to team up with CHARMAINE, a passionate yet delusional local Police Admin Assistant- a wannabe John McLain trapped in Rebel Wilson's body.

As he attempts to investigate thoroughly and by the book, she charges into everything head first- usually landing them in even deeper shit.

Their conflicting investigative methods unearth local government corruption, money laundering, organised crime, and murder... just hopefully not theirs.
